

STANADYNE®

Fuel Manager® Filter/Water Separator Element Cross Reference Guide

Unless otherwise specified, the filter elements in this publication are considered to be FM100 filter/water separators with normal flow direction and a traditional retention design.

Elements that are Reverse Flow, FM10, FM1000 and/or Elements with the Enhanced Retention System (ERS) are identified in the description column.

The Stanadyne part number for the original equipment (O.E.) manufacturer is provided here as a reference. This number is located on the radial surface at the top of each element.

For additional information reference Fuel Manager Brochure (99889), FM100 Assembly Information Chart (99881), Fuel Manager Filtration Systems Parts List (99200B) and the Fuel Manager Users Guide (99795).
